

Extended Control Matrix

Internal sample evidence for the Policy Compliance Tracker evaluation corpus

Control ID: C009

Control Name: Data Classification

Description: Classify information assets by sensitivity and business impact before sharing, storage, or processing.

Control ID: C010

Control Name: Continuity Testing

Description: Test continuity and disaster recovery procedures at planned intervals and record unresolved gaps.

Control ID: C011

Control Name: Backup Restoration

Description: Perform and retain evidence of restoration tests for critical service backups.

Control ID: C012

Control Name: Sanctions Screening

Description: Screen relevant customers, counterparties, and transactions against applicable sanctions lists.

Control ID: C013

Control Name: Transaction Monitoring

Description: Monitor transactions using risk-based rules and investigate unusual activity indicators.

Evaluation note: These controls are project-authored internal sample records used to test source retrieval and control mapping. They are not external regulatory requirements.
