

Business Continuity Policy

Internal sample evidence for the Policy Compliance Tracker evaluation corpus

Document type	Policy owner	Status
Internal policy	Business Resilience Team	Approved sample

Purpose

Define internal expectations for continuity planning, disaster recovery readiness, service restoration, and resilience testing.

Continuity Planning

Critical business services shall maintain documented continuity plans that identify recovery dependencies, responsible owners, communication paths, and restoration priorities.

Recovery Objectives

Each critical service shall record a recovery time objective and recovery point objective appropriate to its operational importance and documented service requirements.

Testing and Review

Continuity and disaster recovery procedures shall be tested at planned intervals. Test results, unresolved gaps, and remediation owners shall be recorded and reviewed by the service owner.

Backup Restoration

Backup restoration evidence shall be retained for critical services, and failed restoration tests shall be treated as control gaps requiring remediation.

Evaluation note: This document is a project-authored internal sample used to test evidence retrieval and policy mapping. It is not an external regulation or legal standard.
