

Data Governance Policy

Internal sample evidence for the Policy Compliance Tracker evaluation corpus

Document type	Policy owner	Status
Internal policy	Data Governance Council	Approved sample

Purpose

Establish internal responsibilities for data classification, data ownership, data quality, lineage, and records management.

Data Classification

Information assets shall be classified according to sensitivity and business impact before they are shared, stored, or processed.

Data Ownership

Each important data domain shall have an accountable data owner responsible for approved use, quality expectations, and access decisions.

Data Quality and Lineage

Data quality issues affecting material reporting or operational decisions shall be logged and assigned. Important data flows shall maintain documented lineage from source to use.

Records Management

Business records shall be retained and disposed of according to approved records schedules and documented ownership responsibilities.

Evaluation note: This document is a project-authored internal sample used to test evidence retrieval and policy mapping. It is not an external regulation or legal standard.
